

uMoya BLOCK SIZED AIR VENTS

These vents are conveniently sized to fit seamlessly into the construction of any building using Building Blocks.

Information

220 GRAMS

PRODUCTION CAPACITY:
30 000 P.M

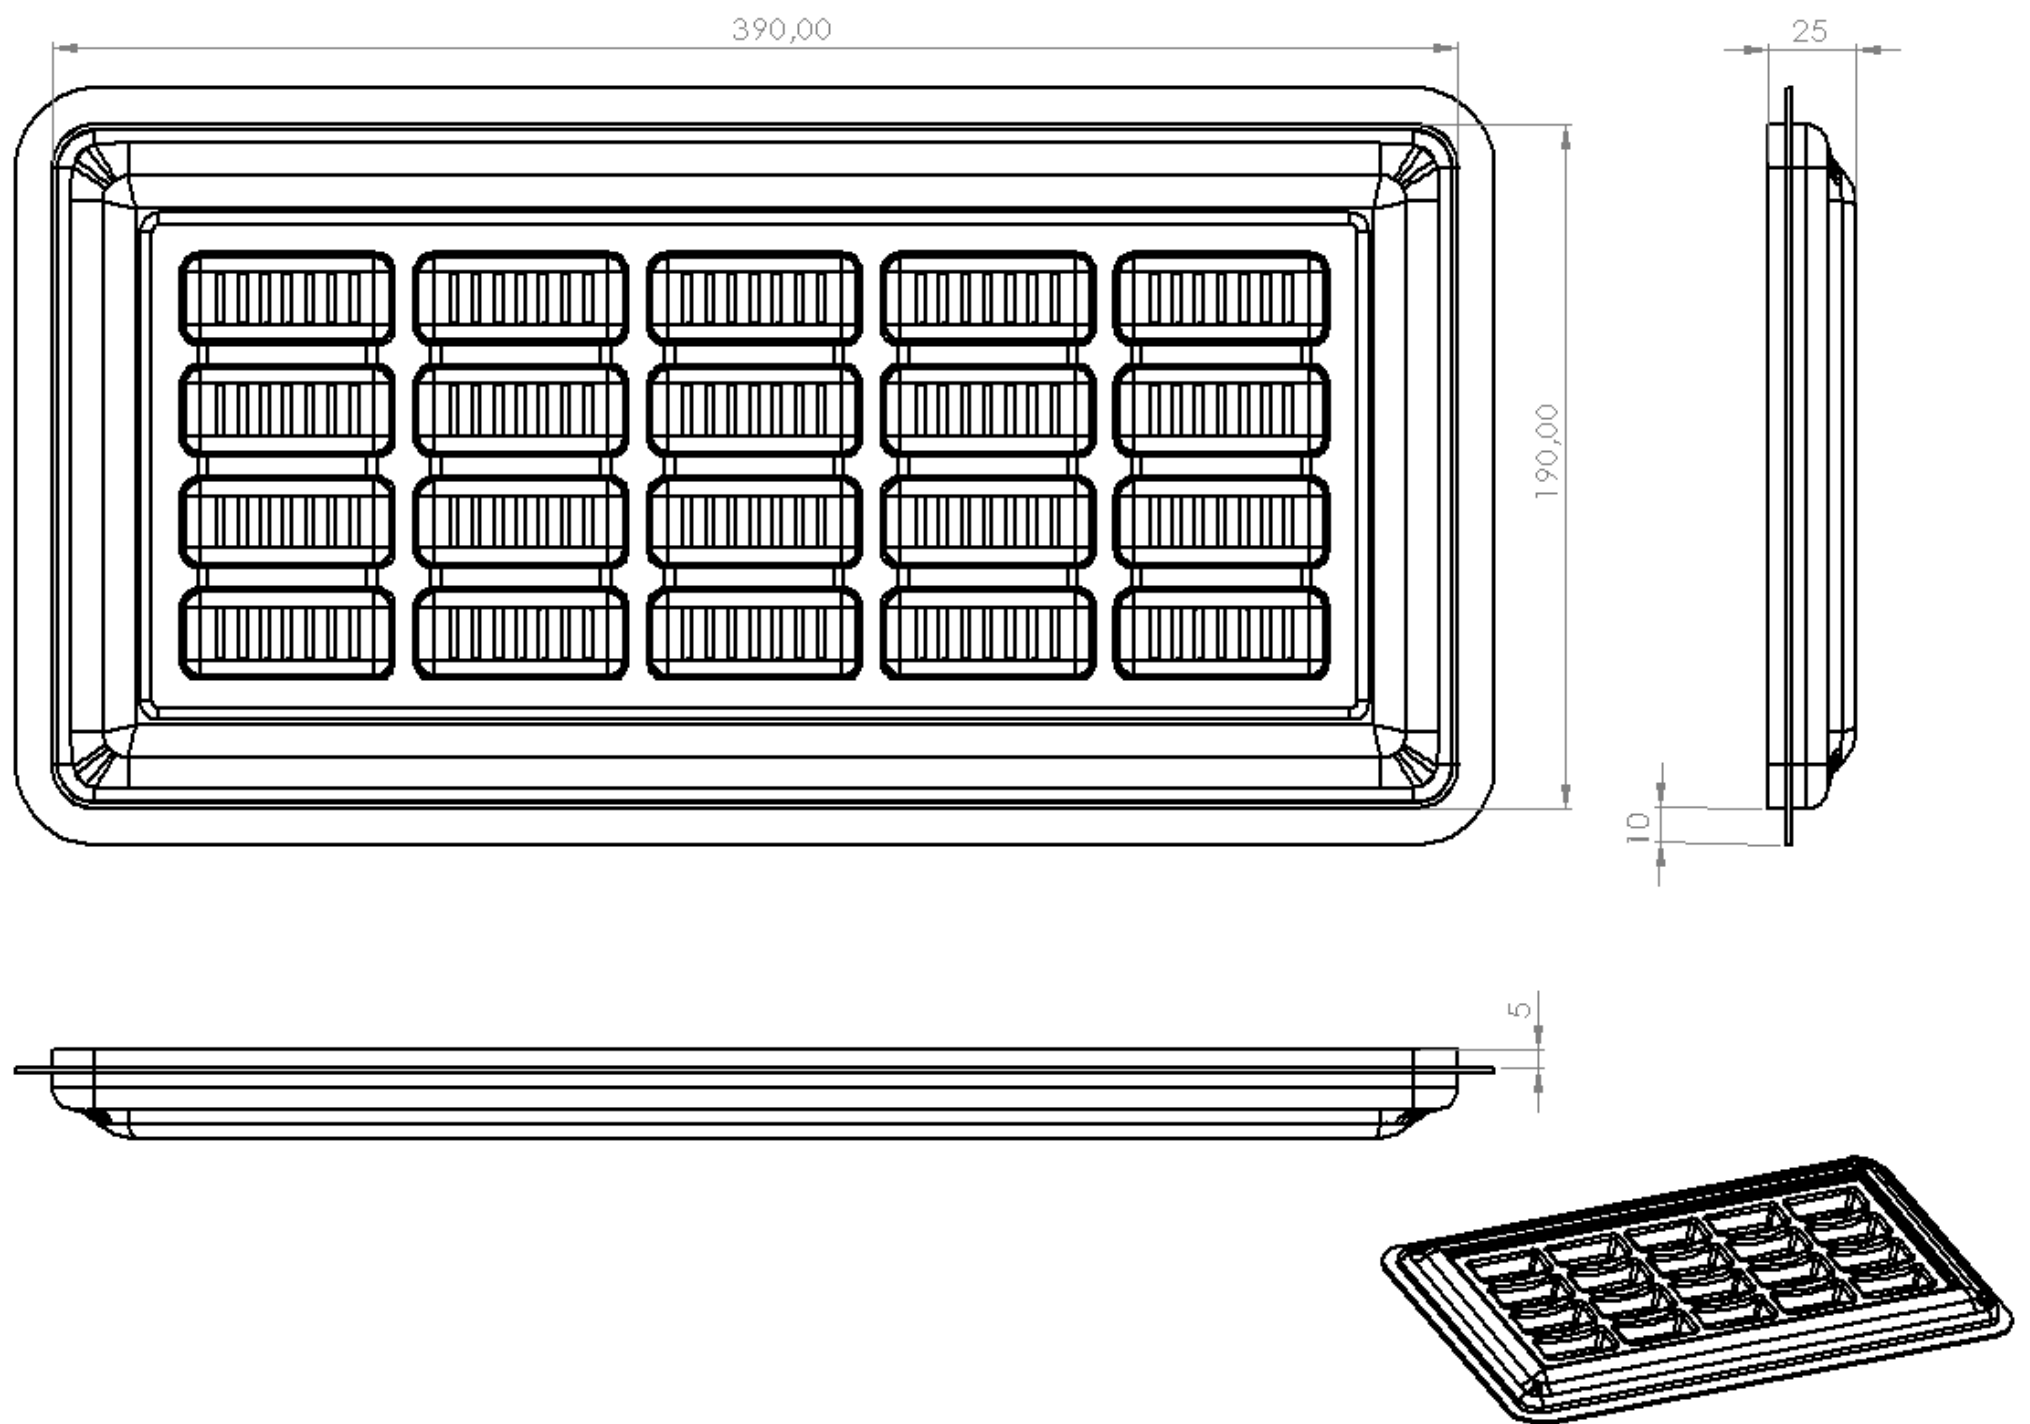

390mm x 190mm with 10mm
lip around for building in.

Concrete Blocks are possibly the most widely used building material available because of their strength and affordability. Umoya block sized air vents are finally here to fill a much needed gap in the construction industry.
